ATTORNEYS AT LAW

Environment, Planning and Regulatory

We have a large and well-established zone, planning, permitting and environmental practice. We specialize in industrial development, zone, planning and land use, power plants and renewable energy projects, chemicals and pharmaceuticals, roads and railways (statutory and regulatory consents for development, process authorizations, and infrastructure agreements), waste management and the environmental aspects of many other corporate activities.

Specific areas of advice:

- Regulatory compliance advice.
- Environmental licensing.
- Guidance on environmental issues (including due diligence, environmental assessments and dangerous substances regulations).
- Non-contentious and contentious advice on environmental matters.
- Zone, planning, permitting and land use.
- Energy (including renewable energy) licensing.
- Waste management.
- Water pollution and water waste.
- Contaminated land, including historic pollutions.
- Pharmaceuticals and healthcare.
- Health and safety advice.
